

### **Project Manager (Data) – South**

Are you an experienced Project Manager looking for a new and exciting challenge? We are currently looking for an experienced Project Manager for a Hampshire-based Data Cabling business. The successful candidate will be responsible for end-to-end project delivery, from technical pre-sales engagement, to design and implementation.

#### **The Role:**

- Working primarily on Data, as well as Telephony, Security and CCTV
- Production of project documentation including risk and method statements and project delivery plans
- Supervise installation and maintenance work completed by the engineering teams together with scheduling installation work and overseeing the procurement of required equipment and materials
- Preparation and monitoring of project budgets
- Ensuring quality assurance and compliance with main contract conditions
- Project management and on-site supervision of engineering and any 3rd party contractors
- Project reporting – highlighting and managing any risks or issues before escalation
- Manage the collection of project handover details and ensuring a smooth delivery into ongoing support service

#### **The Person:**

- Excellent planning, communication and organisational skills
- Ability to communicate and influence with multiple management levels of staff/clients
- Good all-round IT/Microsoft Office skills
- Electrical background
- Knowledge of data centres and cabling
- Confident dealing with clients and contractors
- Project management experience and following projects through from quote to completion

#### **Additional Information:**

- Option to work remotely or from the Head Office
- The package comes with either a company car or car allowance
- Excellent opportunities for progression
- Occasional European travel

**If you feel you have the relevant skills and experience and would like to apply,  
please email a copy of your CV to [jodie@raffertyresourcing.com](mailto:jodie@raffertyresourcing.com)**
