

Lead Data Engineer – South

We are currently recruiting for a Lead Data Cabling Engineer on behalf of a growing business in the south of England. This is a permanent position working on commercial contracts across London and the surrounding areas. This is a fantastic opportunity for a Data Cabling Engineer who has managed a small team who is looking for career progression. There will be opportunities for this candidate to potentially move into Project Management at a later date and work on large-scale projects.

The Role:

- Working primarily on Data, as well as Telephony, Security and CCTV Cabling installations
- Installing Cat5e-Cat6-Cat6a Cabling
- Installing of fibre
- Terminating Patch panels
- Terminating floor/gop boxes and wall/ceiling outlets
- Testing structure cabling using a fluke tester (supplied by TP)
- Labeling data cables, patch panels and floor outlets
- Providing update reports to Project Managers
- Installation of a full range of containment/trunking
- Communicating with Project Managers and clients/customers at a professional level
- Rack, Stack and Patch would be advantageous

The Person:

- We are either looking for someone with experience of leading a team of engineers, or, someone who is ready to step up and progress into that role
- ECS/CSCS card
- Asbestos awareness
- Excellent communication skills (as the role will be client-facing)
- Rack, Stack and Patch would be advantageous
- Experience and knowledge in fluke test equipment
- Full driving licence
- Pasma/Ipaf qualification would be an advantage but not a requirement.

Additional Information:

- Company van provided
- Salary negotiable depending on experience
- Overtime available
- Excellent opportunities for personal development

**If you feel you have the relevant skills and experience and would like to apply,
please email a copy of your CV to jodie@raffertyresourcing.com**
